

Special profiles

Whenever you cannot find the ideal solution for your problem from the wide range of standard extrusions on offer or a solution constitutes a compromise between the use of the space available and the weight, as long as the quantity is correct a special section is the answer.

Released from the dimensional restrictions of the standard profiles, special extrusions are tailored to your design requirements, and offer considerable benefits in terms of machining time and use of space.

Furthermore your calculation will be influenced positively by the optimised material use and shorter machining times. You can determine the combination of the desired thermal properties and the design element yourself, by the use of a special profile. We are not allowed to publish many of our customer-specific Profiles, because they are subject to „non disclosure agreements“. Therefore we only show some examples for customer profiles in the industry. All figures are illustrations. Changes reserved.

If required please send your request.
